Wired and Wireless Detection **xcel PIRs**

COOPER Safety

Offers a common appearance throughout a hybrid installation

xcel series of detectors introduces a housing for wired and wireless standard and pet tolerant PIRs

Easily available batteries

XcelR and xcelRPT take two standard AA batteries available from any retailer

Fewer site visits to change batteries

Battery life increased over the 713/714 from 24 months to 36 months

Fit radio PIR's where you want to

Range improved by 30% over 714 radio

Greater performance for improved security

Consistency of coverage considerably improved due to the new design of spherical lens, five layers of beams and dual element sensor

The xcelRPT responds twice as quickly as the 713 whilst maintaining pet tolerance up to 25Kg

Carry one detector for all installations

Compatible with all current Scantronic and Menvier alarm panels

Wired PIRs

Pet and non pet tolerant

Description

Product Codes	Wired PIR:	XCELW
	Wired PIR Pet tolerant:	XCELWPT
EN50131 Grade	2	
Environmental Class	2	
PIR Coverage	12m by 90° 9m by 90° (Pet)	
Current Consumption	10mA (normal) 15mA (max)	
Pet tolerance	Tolerant to pets up to 25kg (XCELWPT)	

XCELWPT coverage

XCELW coverage

Wireless PIRs

Pet and non pet tolerant

Description

Product codes	Radio PIR:	XCELR
	Radio PIR Pet tolerant:	XCELRPT
EN50131 Grade	2	
Environmental Class	2	
PIR coverage	12m by 90° 9m by 90° (Pet)	
Radio range	100m in free space	
Batteries	1.5v AA alkaline x 2	
Battery life	40 months minimum	
Pet tolerance	Tolerant to pets up to 25kg (XCELRPT)
